TO WHOM IT MAY CONCERN

RE: VALLEY STEEL
MORRIS, MANITOBA.

The above subject company constructed our new credit union building in 1981. The building (steel and stone) is approximately 1600 square feet with office, lunchroom and storage facilities.

To date, we have had no problems with our mechanical services or workmanship. We are pleased with the design and finishing and would recommend the company for any commitment that they may undertake.

Yours truly,
Valley Credit Union Limited.
